👤 About Me

I am a passionate cybersecurity student eager to learn and apply security concepts to protect digital systems. I enjoy exploring ethical hacking, network security, and emerging cyber technologies to build a safe and secure digital environment.

Skills

- Management Skills
- Creativity
- Python
- Networking
- Critical Thinking
- Leadership

🎓 Education

Bachelor of Cyber Security
Mahendra Engineering college   2023- 2027

I am a dedicated B.E. Cyber Security student with a strong foundation in ethical hacking, network security, and information protection. I am passionate about learning and applying advanced cybersecurity techniques to safeguard digital assets and stay ahead of emerging threats in the cyber world."

💼 Skills

Skills in cyber security

"Cybersecurity professionals need a strong foundation in network security, ethical hacking, and threat analysis to identify and mitigate risks effectively. Skills in programming, cryptography, penetration testing, and using advanced security tools are essential. Knowledge of incident response, risk management, and emerging cyber threats ensures robust protection of digital systems. A continuous learning mindset is key to staying ahead in the ever-evolving field of cybersecurity."

📖 project experience

Password Genertaor

Developed a secure password generator that creates strong, random passwords to enhance account security. Implemented features to customize length and complexity, ensuring protection against common cyber threats."
